# THE DOORS OF PERCEPTION

## ALDOUS HUXLEY

The eye of heaven clive cussler. The books of terror and longing.

It's fascinating that all cultures that have experimented with psychedelics have provided consistent feedback regarding the visions in their trips. Heaven and Hell explains how science, art, religion, literature, and psychoactive drugs can expand the reader's everyday view of reality, offering a more profound grasp of the human experience. These conclusions, of course, are entirely hypothetical. Brave New World was Huxley's fifth novel and first dystopian work. If we decide not to incorporate your report, we will usually send you an email message telling you why. His first published novels were social satires, Crome Yellow (1921), Antic Hay (1923), Those Barren Leaves (1925), and Point Counter Point (1928). Like his earlier essay, The Doors of Perception, Aldous Huxley's Heaven and Hell exerted a tremendous influence on the counter-culture movement of the 1960s, inspiring the imaginations of an entire generation of artists and revolutionaries like Jim Morrison and Jackson Pollack. While Huxley was a scientifically minded fellow, his reporting on science errors on some of the grand scale issues (e.g. memory, which is far more fallible than was thought in his day.) (Specific [small-scale issue] findings are probably accurate.) The thing is, Huxley was also a mystic and he viewed biology as a "reducing valve" that mitigated our experience of consciousness—a grand field existing wholly beyond the nervous system, such that our experience of it was hemmed in by biology—rather than being created by it. Of course, he also refers to how such visions extend beyond what is capable in dreams though - it must be noted - some dreamers have reported experiences of full on psychedelic trips. If the book has page numbers, please include the page number; otherwise please include a significant text string to help us to locate the error. "Heaven & Hell" delves much more deeply into said linkages, and I was blown away by some of the ideas in the latter essay. Huxley provides a steady diet of food-for-thought on these topics. In the twentieth century collecting-boxes were placed in the churches for the upkeep and installation of stained-glass windows. For one thing, when one beholds the bold sensory experiences that Huxley witnessed and contrasts them to the visualization of everyday consciousness, it's hard not to believe that one is on a plane entirely outside the bonds of biology. In the 1920s he was also a contributor to Vanity Fair and British Vogue magazines.--Wikipedia.Available FormatsThis book is in the public domain in Canada, and is made available to you DRM-free. There is also a bit of discussion of the commonalities between schizophrenia and psychedelic experience. Early in his career Huxley edited the magazine Oxford Poetry, and published short stories and poetry. If you are comparing this work to a printed copy, please include the edition you used. Most reports are processed within a few days of submission. This report is anonymous. Yet, we don't know why these are shared experiences. The intricate weaving of art and religious experience into the narrative is interesting, as there are obvious cross-over points in respect to man's influences in art and theology, which are - Huxley suggests - intensified by the Mescaline experience. Many books have significant or minor changes between editions. While we strive to fix printer's errors, many words found in our books may have archaic spelling. The book contains descriptions of what Huxley observed under the influence, such as the hallucinations of "sacred geometry" that are common among those consuming hallucinogens. You may do whatever you like with this book, but mostly we hope you will read it. There are no graphics in this volume, nor is it annotated—except for in-text references and a few footnotes. There are also a series of appendices that report on various topics related to mystical / psychedelic experiences such as the effects of CO2, strobe lights, and starvation, as well as the relationship to lighting, works of art, and mental illness. Huxley's ability to capture his experience vividly and his thought-provoking suggestions about the experience make these essays worth the read. Mystery Bookstore, Winnipeg Sleuth of Baker Street, Toronto Audiobook Connection, Burlington Books for Business, Oakville Imaginaire, Laurier Drawn & Quarterley, Montreal Renouf Books, Ottawa Sunrise Marian, Wellan Huxley completed his first (unpublished) novel at the age of 17 and began writing seriously in his early 20s, establishing himself as a successful writer and social satirist. [It may still be in its infancy, but a great deal has been learned—particularly since the technology of the 1990's—] that points to biology being the source of many of these experiences that seem amaterial.]) The two essays are each short. He was best known for his novels including Brave New World, set in a dystopian London, and for non-fiction books, such as The Doors of Perception, which recalls experiences when taking a psychedelic drug, and a wide-ranging output of essays. While I've never done psychedelic drugs, my limited experience with the more-real-than-real world of lucid dreaming makes me sympathetic to this long-held and widely held belief. The serenity of heaven can quickly become too much of lasting for too long and the 'observer' has a desire to return to normality, the mundaneness of this plane. Huxley devotes some space in both essays to discussing the science of these experiences, but I don't see those parts as the strength of the volume. Even with the front matter and appendices, the book comes in at only a little over 120 pages. However, much of these essays are about how what he witnessed mirrors art and the text of mystical religions. I've experienced it once and I woke up very quickly.Huxley outlines the fascination between religion and desire for such visions... The brightness and intensity of colour, the serenity of the light, the geometric shapes, the structures & civilisations, the landscapes, the symbolism and living beings as the most common.
